EXPERIENCE

May 2017 - Present

React Native Developer

Roza Route, Chicago
<https://rozaroute.com/>

I have been working as part of an agile team for the last four months on a React native iOS and Android App. During that time we have collaborated to identify the pain points of the commercial cleaning industry, wire-framed and prototyped an MVP, and developed the app. Libraries tools we have used include redux for state management of our app, redux-thunk for performing actions that require returning of a function, namely promises, and firebase as our database.

November 2016 - Present

Freelance Web Developer

Self-employed, Chicago and San Francisco.
<https://www.feargalwalsh.com>

Developed static websites for clients using Bootstrap, Jekyll, Wordpress, Github- Pages, JavaScript, HTML and CSS.
